Master of Science in Applied Technology

Learning Outcomes

The fundamental idea of SNL is learning from experience. We believe mixing experiences and interpretations results in lasting knowledge.

SNL programs are designed to recognize and develop competence. Our students are assessed on their problem-solving knowledge.

SNL values individualized learning. Students move at their own pace with personalized guidance.

Student will be able to:

- Develop a highly focused body of computer or telecommunication skills.
- Enhance your understanding of the organizational, interpersonal, and learning issues that characterize today's changing work environment.
- Help your organization adapt its technical and social systems to one another.
