B.A. in History

Learning Outcomes

Students can:

- Describe and discuss historical facts, themes, and ideas.

- Identify, analyze, evaluate, and synthesize primary and secondary source evidence.

- Identify and explain how the past is different from the present.

- Express knowledge of the history of individuals and groups who are different from themselves.

- Analyze an event, source, idea or person within its historical context.

- Critically evaluate change over time (the idea that the relationship between events over time suggests meanings that might be overlooked if the events were examined in isolation).

- Identify different perspectives on the past, whether those be historical, interpretive, or methodological in nature.

- Conduct research independently using primary and secondary source evidence.

- Express knowledge and reason effectively in writing.
